A GARDEN HYMN

Thank Thee for the beauty of the gardens,
Lord,
For the complexity of plants and the variety of trees pointing heavenward,
For peace found in garden glades,
For renewed hopes of crushed spirits,
For the solace of still moments,
Lord, I thank Thee for the glory of my garden.

TO PATRIOTIC GARDENERS OF AMERICA

My Dear Friends,

Once more we greet you with our flower seed book, in which we offer the choicest novelty and standard flowers, the largest list in America, and at the lowest prices. It is our purpose to recommend only the good things, which will develop well and prove a source of much pleasure to you, and to your friends. Although the number of varieties we stock has been cut down some because of the war, the seeds we do offer are of the new crop. Those which were not produced on our own grounds, were grown for us by specialists of national reputation. We offer nothing but the best obtainable, and thus, as always: Our chief pride is in the vitality of the seeds themselves, and a quality of stock which has made THE GEO. W. PARK SEED CO. esteemed throughout the nation. **PARK'S SEEDS, AND BULBS ARE THE BEST TO BE PROCURED. ALWAYS DEPENDABLE.**

IN THIS ERA OF ADVANCING PRICES, higher taxes, and greater production costs, we are happy that we can still offer all except the most expensive novelties at the live and let live rate of **5c per packet**, and the high priced novelty items can all be had for only **10c per packet**.

WE OFFER ONLY THE BEST SEEDS THAT CAN BE PRODUCED, in which we are so confident that we do not print the common "express or implied" disclaimer. We guarantee our seeds, to the full extent of the purchase price, to be sure to grow, under favorable conditions, and true to name. We gladly replace them if you are not completely satisfied. We are always willing to do more than fair dealing demands because we feel that our customers are our friends.

PONDERING OVER THE PATRIOTIC EFFORTS OF PEOPLE these days—giving Aluminum, buying defense stamps and paying greater taxes; it seems to me that a most excellent way to help in our drive for preparedness is through gardening: food to help win the war, and flowers to keep us sane.

HAVE A FLOWER GARDEN—a place to enjoy the most beautiful of God's creations, a place to enjoy the good outdoors, a place to get closer to nature, a place where the mind thinks more clearly. There is untold pleasure and satisfaction to be derived from the planning and making of a lovely outdoor living room, that garden of yours.

HAVE A VEGETABLE GARDEN—with prices of food going up and maybe food becoming scarce—it is very good sense to plan now for that early spring and summer food supply and for a surplus to can for next winter. This will insure a food supply for yourself, conserve that important pocketbook, and release needed commercially grown food for the army. And by the way, home grown vegetables are fresher, tastier and healthier.

THANK YOU FOR YOUR PAST FAVORS. WE ANTICIPATE THE PLEASURE OF AGAIN HEARING FROM YOU, AND ASSURE YOU THAT YOUR ORDERS WILL HAVE OUR MOST CAREFUL ATTENTION.
January 1, 1942. GEO W. PARK SEED CO., GEO. B. PARK.

Park's Unsurpassed ZINNIAS

Zinnias are of easiest culture. For an extra early start, seeds may be sown in flats and transplanted; however, they grow more sturdily if sown in the bed where they are to stand, after all danger of frost has passed. When plants are a few inches high, keep well cultivated and give thorough soaking by trench method every two weeks. These flowers have been so wonderfully developed and improved and come in such a splendid array of varieties in size, color and form that no garden can be "in style" without them. We take pleasure in presenting for your selection a wide and varied assortment.

STOCK EARLY COLONIAL

This lovely basal branching type of stock was first introduced in 1941, and met with immediate approval everywhere. The reason for its wide acceptance is that it does not produce a central spike, so requires no pinching to make it branch. Large 2 in. florets are typical of this new strain, and they form clusters fifteen inches long. High percentage of doubles.

PAPAYER—POPPIES

These are old fashioned flowers, but how showy and beautiful they are! Once in the garden they almost take care of themselves. The large ones are as handsome as Paeonies, and quite as showy and pleasing, while the single flowers exhibit a wonderful variety of shades and variegations, and are always admired. In garden beds and borders they are truly gorgeous, and a few seeds scattered about the vegetable beds make bright and beautiful the vegetable garden without detriment to the growing plants. Poppies should adorn every home and it pays to use only the improved varieties, such as we offer. The seeds may be sown either in Fall or early Spring. Do not let the plants crowd.

CHOICE VERBENAS

The Hybrid Verbenas are among the most beautiful and useful of our flowers. Seedlings begin to bloom early and continue freely until winter, making a fine display in either beds, borders, or pots. In pots they bloom until Christmas. Good to fill in that space left vacant in the border when spring bulbs finish blooming. The individual florets of the **Hybrida Grandiflora** Type are larger and in larger clusters than other types. Its habit suits it well to bedding, since it is free blooming and makes a solid mass. Also good for cutting. The **Dwarf Compact Hybrids** are ideal for borders or edgings, and may also be used in beds or pots with good results. The plants are dwarf and branches grow erect, massing the flower heads at the top of the plants. The **Bouquet** group is of very recent perfection and is the best Verbena for cutting purposes or tall border, due to its tall erect habit of growth. They are all deliciously fragrant and continuous blooming.

These are valuable subjects of the flower garden, as most of them are not only showy and beautiful when in bloom, but will do service year after year for a long period, enduring cold, excessive rain and drouth, regardless of neglect and improper attention. They are easily grown from seeds, except a few which are tardy and will lie dormant in the ground for several months, or a year or two, before germinating. All are readily transplanted, and will generally thrive in the soil and exposure of an ordinary garden. When you make out your order, do not forget to select a few perennials. Once started, they will afford you as much satisfaction and pleasure as anything you can grow. Directions for making outdoor beds and sowing seeds are sent upon request.

SELECT GLADIOLUS

Gladiolus are rightly the most popular summer flowering bulb, for no other gives the diversity of beautiful color, the excellent cut flower, nor the striking garden bed with so little care and so small an expenditure.

We offer a choice selection of the finest named Gladiolus; grown in clean, disease free soil of Michigan. Our Bulbs are doubly protected against insects and disease by a Naphthalene treatment which we give them. We offer large, clean healthy bulbs, sure to bloom and guaranteed to give you satisfaction. All bulbs are of the largest size No. 1 bulbs, 1½ inches or larger in diameter. This large size is secured at a premium both in cost of bulbs and transportation, but we offer them at prices which are without doubt the lowest anywhere. Select yours today, while we still have stock of all varieties.

LARGEST BULBS OBTAINABLE (TOP SIZE) 1½ in. and up. Finest, largest blooms, sturdiest plants.

We pay all postage and warrant the safe arrival of the bulbs. When received, plant them five inches deep in a sunny bed of rich, porous garden soil and mulch the bed with well decayed stable litter; this will promote a vigorous growth and bloom and keep the soil moist during a moderate drouth. Cultivate often, especially after each rain.

For Health, Economy and—A dependable food supply during the shortage

Tomato, Super Master Marglobe

SUPER MASTER MARGLOBE

"The Tomato with the extra slice"

Rightly the most popular tomato among home gardeners and market growers alike, for it produces large, smooth, meaty, globular, red fruits with very small seed cavity. Fruits ripen evenly and are free from cracks. Marglobe produces an extremely heavy crop and is resistant to rust, wilt and blight, which explains why it will give a good crop even under unfavorable conditions. Pkt. 5c; 1/2 oz. 25c; Oz. 40c; 1/4 lb. \$1.25; Lb. \$4.00.

RUTGERS

"For Fair Weather or Foul"

Fruit of great size (8 oz. average) combined with a sturdy stem which holds the large tomatoes above the mud gives Rutgers its popularity. Five days later than Master Marglobe, it is especially recommended for southern gardens. A dark red interior, delicious flavor, large size, sturdy stalk, tolerance to unfavorable weather all combine to make this one of the most desirable of tomatoes. Pkt. 5c; 1/2 oz. 25c; Oz. 40c; 1/4 lb. \$1.25; Lb. \$4.00.

STOKESDALE

"The Tomato of the year"

A tomato of streamlined proportions one week earlier than Marglobe and more productive. Stokesdale has the same solid texture as Marglobe, weighs 6 ounces and is round in shape, brilliant, smooth and uniform in appearance. It gives an unusually high yield. Just the tomato for the short northern season. Don't forget it when planning your Defense vegetable garden for health and economy and insurance against food shortage. Pkt. 5c; 1/2 oz. 30c; Oz. 45c; 1/4 lb. \$1.60; Lb. \$5.00.

VICTOR

"All American"

(All American Bronze Medal). The vigorous plants are small and can be planted close together. Produces an abundant crop of extra early, smooth scarlet fruits which are of excellent, solid texture, and do not crack. Splendid for early home or market use. We recommend Victor as the best early tomato. Pkt. 5c; Jumbo pkt. 10c; 1/2 oz. 40c; Oz. 75c; 1/4 lb. \$2.53.
